CLAIMS

- 1. A method of treating migraines, comprising:
 - a) providing i) a patient having one or more symptoms of a migraine and ii) a formulation comprising dihydroergotamine;
 - b) administering said formulation to said patient sublingually under conditions such that said one or more symptoms of said migraine are reduced.
- 2. The method of Claim 1, wherein said dihydroergotamine is a pharmaceutically accepted salt.
- 3. The method of Claim 1, wherein said dihydroergotamine is a pharmaceutically accepted base.
- 4. The method of Claim 1, wherein said sublingual administration is via a liquid.
- 5. The method of Claim 4, wherein said liquid is administered by a spray.
- 6. The method of Claim 4, wherein said liquid is administered by drop.
- 7. The method of Claim 1, wherein said sublingual administration is via a paste or gel.
- 8. The method of Claim 1, wherein said sublingual administration is via a tablet or compressed powder.
- 9. The method of Claim 1, wherein said method additionally comprises the co-administration of at least one other pharmaceutically accepted compound.
- 10. The method of Claim 9, wherein said pharmaceutically accepted compound is a non-vasodilating treatment for migraine.
- 11. The method of Claim 1, wherein said therapeutic formulation of DHE additionally comprises at least one pain reliever.
- 12. The method of Claim 1, wherein said therapeutic formulation of DHE additionally comprises at least one antiemetic.
- 13. The method of Claim 1, wherein said sublingual administration is via a fast dissolve formulation.
- 14. The method of Claim 1, wherein said formulation additionally comprises at least one effervescent agent.
- The method of Claim 1, wherein said formulation additionally comprises at

5

- least one pH adjusting agent.
- 16. The method of Claim 1 wherein, said formulation additionally comprises at least one bio/mucoadhesion agent.
- The method of Claim 16 wherein, said formulation additionally comprises at least one disintegrant.
